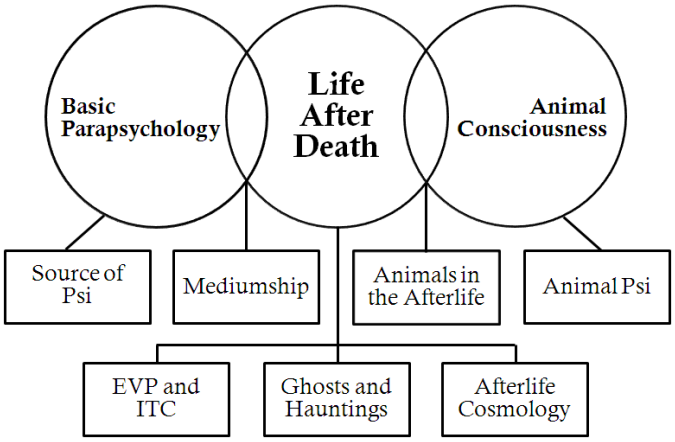
The Windbridge Institute
for Applied Research in Human Potential

Using traditional scientific methods to study nontraditional phenomena…

Main Areas of Research at the Windbridge Institute



The **Basic Parapsychology or Psi Research** program explores traditional parapsychological topics (i.e., telepathy, precognition, clairvoyance, and mind-matter interactions) as well as experimenter effects and the potential that exists within each of us.

The survival of consciousness (or **Life After Death**) hypothesis proposes that at least part of an individual's personality or consciousness continues to survive after the death of the physical body. At this time, the Windbridge Institute is primarily focused on studying mediums and the information they report, investigating technologies that may be useful in enhancing interaction and communication with the deceased [i.e., electronic voice phenomena (EVP) and instrumental transcommunication (ITC)], addressing reports of haunting and apparition phenomena, and exploring afterlife cosmology.

Non-human Animal Consciousness research investigates a variety of phenomena including animal psi, the human-animal bond, and survival of animal consciousness after physical death.

What Makes Us Different?

Founded in 2008 by husband-and-wife research team Mark Boccuzzi and Julie Beischel, PhD, the Windbridge Institute is a unique research organization. We are...

- **Innovative**: We have demonstrated several rigorous and novel methods to study controversial topics like mediumship and instrumental transcommunication.
- **Connected**: Our research team includes an elite group of Windbridge Certified Research Mediums (WCRMs) and an extensive international Scientific Advisory Board.
- **Efficient**: As a small organization with minimal overhead, we can really stretch a research dollar.
- **Independent**: We have the freedom to investigate the most important questions without having to contend with a parent organization's biases and red tape.
- **Open:** We actively get study results into the world as quickly as we can -- regardless of whether they are positive or negative.
- **Respected:** Here is what others have said about the Institute and our work...

"Beischel herself has played a major role in strengthening the methods used in this field and her research exemplifies her rigor and sophistication."

—Daryl Bem, PhD
Professor Emeritus of Psychology, Cornell University

"The research that takes place at the Windbridge Institute has been judged by international peers to be important and reflects the Institute's commitment to conducting world-class science."

—Dean Radin, PhD
Senior Scientist, Institute of Noetic Sciences (IONS)
